

Announcing Erlab's Flexible Payment Solutions - *Powered by NEC Financial Services*

You have done extensive research, read countless reviews, and even participated in real time virtual demonstrations that certify Erlab filtration products as the best in their industry. Your decision to insist on safety, reliability, qualifying chemical evaluation and reports, innovation, ease of installation, and maintenance support as your purchasing criteria is commendable. It is obvious that you will 'get what you pay for' with Erlab equipment which includes peace of mind for all personnel in the areas of operations.

All the boxes have been checked except perhaps, determining the best way to pay for your top-of-the-line capital equipment. After an extensive search for the perfect financial partner who can offer fair, competitive programs and services to our valued Erlab clients, we are proud to announce that NEC Financial Services is joining our team. This established financing and leasing company can offer enhanced options that include:

- Short term financing
- SLED lease program, (State & Local Government and Education)
- Deferred payment programs
- Cash flow recovery programs

NEC
Your Strategic Financing Partner

Since 1986 NEC Financial Services has been helping customers acquire equipment, software, and services.

NEC offers customized payment terms that meet your needs and budget requirements, including deferred payments, step payments, seasonal payments, annual, semi-annual, quarterly, or monthly payments.

For example, if you choose one of their financing/leasing programs, at the end of your lease you will own Erlab's equipment with no additional payment necessary. Additionally, based on your application approval, you can choose from short or long-term financing solutions, combine your leasing and maintenance costs into one all-inclusive monthly payment, choose a 'no payment' for 90 days deferred payment plan, or separate your monthly maintenance.

Erlab is pleased to have found a financial partner whose ethics and customer service philosophy align with our own. It is our hope that this partnership will be beneficial in expediting the successful purchase of the Erlab product of your choice.

About Erlab

Erlab's state of the art Research & Development Laboratory relies exclusively on filtration.

Experts in the field of safety for laboratory personnel since its inception in 1968, Erlab continues as the world innovator in the development of advanced technology for [air filtration products](#).

The combination of reliable materials, smart engineering, and performance driven technology guarantees the highest level of safety and exceptional working conditions. Welcome to a high-tech company at the forefront of products backed by extensive research in the fields of safety, economic performance, energy savings, and sustainable development.

VISION

The harmful effects of air pollution on health are dangerously underestimated in all industrialized countries. Millions of tons of chemical agents that are produced by scientific, medical, and industrial research can have carcinogenic, mutagenic, and reprotoxic effects, as they are invisible. Preventing their release into the atmosphere within both working and public environments as well as improving their detection have become public health issues and Erlab's focus.

REACH

The filtration of toxic gases and pathogenic agents is a global issue. Since its creation in 1968, Erlab has enjoyed rapid development and international support across Europe, America, Asia.

Erlab is established in every market with high growth potential and strategic importance. The ambitious spirit at Erlab ensures it has a daily presence in all corners of the world. Erlab teams innovate every day from all of their sites in: Val de Reuil, France, Rowley, MA, a few miles north of Boston, and in Shanghai, China

MISSION

The highest level of safety for all.

Call or email us to get additional details on financing the best ductless filtration products today so ***you can breathe*** safely every day.

Regards,
The Erlab Air Filtration Safety Team
